# Email relay mygovuc

# check ip tu ada akses atau tak

```
curl https://postmaster.mygovuc.gov.my/cgi-bin/myip
```

# telnet (windows / linux)

using CMD

* ``telnet postmaster.mygovuc.gov.my 25``
* ``EHLO bmt.mampu.gov.my``
* ``MAIL FROM: shaiful@mampu.gov.my``
* ``RCPT TO: mampu2288@gmail.com``
* ``DATA``
* ``From: shaiful@mampu.gov.my``
* ``To: mampu2288@gmail.com``
* ``Subject: this is a test``
* ``this is an rfc compliant email sent using telnet via ip based authentication``
* ``.``
* ``QUIT``

# swaks (linux)
2. Kaedah alternatif untuk verifikasi SMTP Relay with IP Authentication

``swaks --to mampu2288@gmail.com --from shaiful@mampu.gov.my --server postmaster.mygovuc.gov.my:25 --body "test - `date`" --tls``

``swaks --from sistemekgbaru@kpkt.gov.my --to tmukmkd@gmail.com --server postmaster.mygovuc.gov.my:25 --body "test - date" --tls --auth-user '<username>' --auth-password '<password>'``

# send-mailmessage (windows)

using powershell

``Send-MailMessage -To mampu2288@gmail.com -From shaiful@mampu.gov.my -SmtpServer postmaster.mygovuc.gov.my -Port 25 -Subject "Test" -Body "test - 25 Jan 2021"``

# laravel

perlu cipta satu view blade kosong eg. mailtest.blade.php pada `resources/views`

``Mail::send('mailtest', [], fn($m) => $m->to('tmukmkd@gmail.com')->subject('Testing mails'));``
