

Misc

- [postman auto store token](#)

postman auto store token

put script at pre-request tab

```
const jsonData = pm.response.json();

if (jsonData.token) {
  pm.environment.set("token", jsonData.token); // or use pm.variables.set()
}
```

add token in enviroment variable. token will be push when success login

//

put {{token}} in authentication tab with bearer been selected.
