composer 1 memory limit

issue

composer will run into memory limit due to memory leak when checking lot of package.

solution:

temporary usage unlimited memory

```
php -d memory_limit=-1 /usr/local/bin/composer require prettus/l5-repository
```

```
/usr/bin/composer
```

```
php -d memory_limit=-1 /usr/bin/composer update
```

update to composer 2

need to check if current package support composer 2 or not.

install in centos

Centos 8 Stream

```
``sudo dnf upgrade --refresh -y``
```

EPEL

```
``sudo dnf install https://dl.fedoraproject.org/pub/epel/epel-release-latest-8.noarch.rpm``
```

REMI

```
``sudo dnf install dnf-utils http://rpms.remirepo.net/enterprise/remi-release-8.rpm``
```

if old php is installed

```
``sudo dnf remove php php-fpm -y``
```

remove package

```
``sudo dnf remove php* -y``
```

reset list

```
``sudo dnf module list reset php -y``
```

enable php8.1

show list

```
``sudo dnf module list php``
```

enable remi php8.1

```
``sudo dnf module enable php:remi-8.1``
```

basic php for laravel

```
``dnf install php php-fpm php-opcache php-gd php-curl php-mysqlnd php-mbstring php-dom zip unzip php-zip php-json php-pdo php-pdo_mysql``
```

other if needed

```
``php-cli php-intl php-common php-bcmath php-imap php-imagick php-xmlrpc php-json php-  
readline php-memcached php-redis php-mbstring php-apcu php-xml``
```

confirm installation

```
``php -v``
```

Laragon to Open 2 Different System with different PHP version

Terminal Project with PHP7.4

...

```
cmd.exe /k "set PATH=C:\laragon\bin\php\php-7.4.33-nts-Win32-vc15-x64;%PATH%"
```

...

Terminal Project with PHP8.3

...

```
cmd.exe /k "set PATH=C:\laragon\bin\php\php-8.3.7-nts-Win32-vs16-x64;%PATH%"
```

...

After run that command, you can use command "php artisan yourcommand" or "composer" like always.

-- command "composer install"

****Attention : Please rename path based on your php version.. ****

preg_replace

```
```php
```

```
preg_replace('/\W|_/', "", "") // remove non-alphanumeric
```

```
preg_replace("/[^A-Za-z0-9]/",
```

```
preg_replace('/[^\d]/i', "", "") // remove non-numeric
```

```
preg_replace('/[^A-Za-z0-9\ \-\n\,]+/', "", $address); // remove non alpha + new line, space, some
special char
```

```
```
```
