

Laragon to Open 2 Different System with different PHP version

Terminal Project with PHP7.4

...

```
cmd.exe /k "set PATH=C:\laragon\bin\php\php-7.4.33-nts-Win32-vc15-x64;%PATH%"
```

...

Terminal Project with PHP8.3

...

```
cmd.exe /k "set PATH=C:\laragon\bin\php\php-8.3.7-nts-Win32-vs16-x64;%PATH%"
```

...

After run that command, you can use command "php artisan yourcommand" or "composer" like always.

-- command "composer install"

****Attention : Please rename path based on your php version.. ****
