Caddy Webserver

```
t322.demolah.com {
	root * /var/www/t322/public

	# Laravel route handling: only rewrite if file doesn't exist
	handle {
		@notStatic {
			not file
		}

		 rewrite @notStatic /index.php

		php_fastcgi unix//run/php/php8.4-fpm.sock
		file_server
		encode zstd gzip
	}

	header {
		# Prevent clickjacking
		X-Frame-Options "SAMEORIGIN"

		# Prevent XSS attacks
		X-XSS-Protection "1; mode=block"

		# Block content sniffing
		X-Content-Type-Options "nosniff"

		# Enable HSTS (force HTTPS in browsers)
		Strict-Transport-Security "max-age=63072000; includeSubDomains; preload"

		# Referrer policy (less data leakage)
		Referrer-Policy no-referrer-when-downgrade
		# Referrer-Policy "strict-origin-when-cross-origin"

		# Content Security Policy (optional - adjust for your use case)
		Content-Security-Policy "
			default-src 'self';
			img-src * data:;
			font-src  'self' https://t322.demolah.com https://fonts.gstatic.com data:;
			 style-src 'self' 'unsafe-inline' https://fonts.googleapis.com;
			 script-src 'self' 'unsafe-inline' 'unsafe-eval';
		 "

		# Disable FLoC
		Permissions-Policy "interest-cohort=()"

		# Remove server version (optional)
```

```
        -Server Caddy
    }

    @staticFiles {
        path *.js *.css *.png *.jpg *.jpeg *.gif *.svg *.woff2 *.woff *.ttf *.eot
    }

    header @staticFiles {
        Cache-Control "public, max-age=31536000, immutable"
    }

    log {
        output file /var/log/caddy/t322.demolah.com.access.log {
            roll_size 10mb
            roll_keep 5
            roll_keep_for 720h
        }

        # Log format: JSON or common
        format json
    }
}
```

tips:

kalau depan ada cloudflare

ssl/tls

- overview guna strict mode

edge

- always user https matikan,
- automatic https rewrites matikan
